Full Stack Software Engineer

Professional Summary:

As a Full Stack Software Engineer with over 6+ years of experience, I possess a deep understanding of both front-end and back-end technologies. My experience spans the entire software development life cycle, from gathering requirements and designing solutions to deployment and maintenance.

My expertise in front-end development includes creating interactive, responsive user interfaces using technologies such as HTML5, CSS3, and Angular. I have a keen eye for design and usability and am adept at converting formats into fully functional web pages that provide a seamless user experience.

On the back end, I have extensive experience developing scalable and efficient APIs and services using languages like Typescript and C# (.NET Core). I am proficient in optimizing database queries and designing database schemas, with a strong background in SQL server databases.

In addition to web development, my skill set includes mobile app development. I have hands-on experience in building cross-platform mobile applications using Android and Flutter.

Skill Set

- **Programming Languages**: Typescript, C#
- **Front-end Development**: HTML5, CSS3, Angular
- **Back-end Development**: .NET Core
- **API Development**: RESTful APIs, GraphQL
- **Databases**: SQL Server, Postgres
- **Cloud Services**: AWS, Azure
- **DevOps**: Docker, Jenkins, Kubernetes
- **Version** Control: Git
- **Testing**: Unit Testing, Integration Testing (Jest, Mocha, JUnit)
- **Tools**: Visual Studio Code, Visual Studio, Postman
